Polyurethane Suspension Components

Polyurethane Suspension Components are unaffected by oil, atmospheric conditions, chemicals, or heat and will not deteriorate or rot, lessening the chance of uncertain response under racing conditions. Hyperflex Systems are comprised of a complete boxed set of suspension bushings, body mounts, spring isolators, etc., for a given application. Signify -G (Black), or -R (Red), for the color desired. Example: ENE3-3156-R would signify red bushings.
