

Heavy Duty Oil Stabilizer LUC10001

Formulated to eliminate dry starts, resist thermal breakdown and reduce smoke, leaks, knocks and blow-by. May also be used in transmissions, differentials and transfer cases to reduce heat and noise. Sold in one quart bottles.

Pure Synthetic Oil Stabilizer LUC10130

Originally designed for racing use with synthetic oil, Pure Synthetic Oil Stabilizer reduces frictional heat and wear in engines, transmissions and differentials for increased horsepower and fuel mileage. Sold in one quart bottles.

20/50, 50 and 70 Plus Racing Oils

Super slick high performance lubricants, for racing or heavy duty engines, reduce friction and increase horsepower. Anti-foam agents protect against wear and scuffing and a protective film assures a "wet" start every time. Especially resistant to breakdown caused by nitromethane or alcohol contamination.

Part No.	Description
LUC2050020/50 Plus Racing Oil, 1 Quart
LUC2050220/50 Plus Racing Oil, 1/2 Gallon Container
LUC1004450 Plus Racing Oil, 1 Quart
LUC1009450 Plus Racing Oil, 1/2 Gallon Container
LUC2070070 Plus Racing Oil, 1 Quart
LUC2070170 Plus Racing Oil, 1 Gallon Container

Semi-Synthetic 10W-40 Oil LUC10176

Blended top quality base stocks and high performance additives assure longer engine life, easier cold weather starting and extended oil change intervals. Sold in one quart bottles.

Synthetic 5 Racing Oil LUC10105

Synthetic 5 is formulated for high temperature and high RPM use. It maintains stable oil pressure and provides a super slick protective film not usually found in a light weight oil. Sold in one quart bottles.

Earl Pearson

NEW SUPPLIER!

Synthetic Oils

A formulation of top quality synthetic bases and exclusive, high performance additives delivers extra protection, reduced drag, better fuel mileage and more horsepower for racing use. Sold in one quart bottles.

Part No.	Description
LUC10179Synthetic 0W-30 Oil
LUC10082Synthetic 5W-20 Oil
LUC10049Synthetic 5W-30 Oil
LUC10050Synthetic 10W-30 Oil
LUC10054Synthetic 20W-50 Oil

Sure-Shift Semi-Synthetic Automatic Transmission Fluid LUC10052

Quality base stocks, blended with synthetics, detergents and anti-wear agents for longer life and less friction. Sure-Shift will withstand high temperatures and reduce foaming for smooth, precise shifting. Sold in one quart bottles.

80/90 and 85/140 Plus Gear Oils

Formulated with anti-wear and anti-seize agents to lengthen component life and reduce power draw. "Climbing" additives resist breakdown and blend with other lubricants, even synthetics. 85/140 Plus Gear Oil is recommended for stopping leaks and reducing lash in worn gear sets.

Part No.	Description
LUC1004285/140 Plus Gear Oil, 1 Quart Bottle
LUC1004380/90 Gear Oil, 1 Quart Bottle
LUC1004585/140 Plus Gear Oil, 1 Gallon Container
LUC1004680/90 Gear Oil, 1 Gallon Container

75/90 and 75/140 Synthetic Gear Oils

Pure synthetic, non-foaming gear oils with additives to resist "squeezing out" under extreme pressure. Formulated specifically for high performance or heavy duty use. Available in 75/90 and 75/140 grades to maintain lubricity, even under extreme temperature conditions.

Part No.	Description
LUC1004775/90 Synthetic Gear Oil, 1 Quart Bottle
LUC1004875/90 Synthetic Gear Oil, 1 Gallon Container
LUC1012175/140 Synthetic Gear Oil, 1 Quart Bottle
LUC1012275/140 Synthetic Gear Oil, 1 Gallon Container

X-Tra Heavy Duty Grease LUC10330

Sheer, stable lubricant has exceptional extreme pressure and water resistance. Exceeds original equipment "Lube For Life" specifications and lasts four times longer than lithium grease. Sold in 1 lb. tubs.

Red "N" Tacky Grease LUC10005

Red, tacky lithium 12-OH Grease, with rust and oxidation inhibitors and extreme pressure additives, will withstand heavy loads for long periods of time. Sold in a 14.5 oz. cartridge.
