

## Lightweight Aluminum Battery Hold Downs

Offered in billet or stamped aluminum, hold downs are designed to secure XS Power Batteries.

Part No.	Description
XSP511	S680 Stamped Side Mount Box With Window
XSP515	S680 Billet Hold Down
XSP525	S925 Billet Hold Down
XSP527	S925 GM Direct Mount And Universal Mounting Kit
XSP535	S975 Billet Hold Down
XSP545	S1200 Billet Hold Down

## Battery Post Adapters

Brass adapters allow use of conventional, post style terminals on XS Power batteries. Sold in pairs with fasteners.

Part No.	Description
XSP580	Short Brass Post Adapters, M6
XSP586	Tall Brass Post Adapters For 925/1200 Models, M6

## 12-Volt/16-Volt Battery Intellicharger XSP1005

Compatible with 12- and 16-volt batteries, Intellicharger has a 25 amp maximum output, three charging modes, LED indicators with ammeter to monitor status and a built-in cooling fan. It weighs 24 lbs. and includes heavy duty 6' cables and clamps.

## 16-Volt Battery Intellicharger XSP1004

For use with 16-volt batteries, constant current/constant voltage charger has a 20 amp maximum output and two charging modes. LED indicators with ammeter monitor status, and a built-in cooling fan increases reliability. Charger weighs just 16 lbs. and includes heavy duty 6' cables and clamps.

Yella Terra brings affordable race rockers into the 21st century, eliminating the problems associated with studs, guide plates and stud girdles. Serious engine builders use and recommend shaft rockers for a more stable valve train and more horsepower.

## Platinum Twin Shaft Rocker Arms

Intake and exhaust rockers are joined in pairs on a shaft that is 22% larger and engineered for extreme RPM. Maximum width bearings deliver greater rigidity, resistance to breakage and superior load carrying ability, eliminating the need for screw-in studs, guide plates and stud girdles. Rocker arms bolt to existing 7/16" stud mountings with supplied bolts. Easy to service in the field. Sold in sets of 16.
